

Cisco Broadsoft.

Cisco Broadsoft is the leading cloud phone system you can trust. Bluecube's expert team will plan, implement & manage a bespoke communications system for your organisation.

Bluecube have been successfully deploying this platform to businesses for over 7 years now. After the acquisition of Broadsoft by Cisco the platform has been developed further and now offers the tools and flexibility for any business.

Whether your team are based in the office, working from home or need the flexibility to work from anywhere, Cisco Broadsoft

have the toolkit to build a system that offers every individual the right functionality for their job role.

Choose from a vast range of desktop and wireless devices or work from a mobile device via our softphone and App suite.

What Cisco Broadsoft can do for you...

- ✓ **Comprehensive PBX features** – Welcome callers with a virtual receptionist and present a professional appearance with personalised on-hold marketing messages. Call queues ensure missed calls are minimised whilst call recording helps with training and dispute resolution.
- ✓ **Advanced call reports** – Bluecube's advanced call monitoring and reporting software gives unrivalled insights into how your business is performing. Our Unity PC software provides makes call control simple.
- ✓ **Enhanced experience for mobile devices** – Use a softphone on your desktop or laptop or our mobile device app to be more productive, from anywhere.
- ✓ **Easy cloud phone system management** – Cisco Broadsoft is intuitive to use and we provide free user training until you know exactly how to get the best out of the platform. We also take care of the provisioning & management of your system so that you don't need an expert onsite.

Pricing
