

Microsoft Teams Telephony.

Microsoft Teams Telephony allows your team to make, receive and transfer internal AND external calls via the Teams application.

Bluecube's Microsoft Teams Telephony connects with Microsoft Teams and allows businesses to use the application as their main business telephone system. Microsoft Teams Telephony can be used in conjunction with existing IP phones or with a headset connected directly to Teams.

Bluecube's Teams Telephony offers a familiar interface for your telephony and a cost-effective alternative to many other telephony solutions. We offer **FREE** unlimited UK calls, NGN number availability, fully managed UK number porting, international dialling and fraud protection is added as standard.

Key Benefits

- ✓ **Greater Flexibility** – different commercial options to meet your business needs
- ✓ **Seamless Migration** – Fully managed, no hassle migration to the service
- ✓ **Scalability** – Add additional voice channels & users as your business grows
- ✓ **Fraud Detection** – By default fraud detection is added for all telephony services
- ✓ **Future Proof** – PSTN & ISDN will be turned off in 2025 and all businesses will have to move to an IP based telephone application
- ✓ **Number Porting** – Keep your existing business numbers, fast & efficient number porting
- ✓ **Unified Communications** – Internal & external business calls, video, IM, file sharing, screen sharing and email all in one place
